Our professionals, supported by all of the **Total Logistic Services** divisions, both by the suppliers and agents, plan the logistics dealing with all types of bodies and entities required to ensure that they reach their objective: the professional implementation of your project.

Adjusting us to your **needs**

Our clients tell us where and why they need us and our **totalproject** division satisfies your requirements by adapting our services to your needs.

We design the logistics of the service that your project requires controlling each of the phases from the origin to the destination.

Our service versatility and adaptation capacity allow us to implement any type of industrial logistics project wherever, however and whenever you want.

With added **value**

Your project cannot be limited to rely only on the aspiration of covering certain aspects of your logistics chain. Our **totalproject** division offers you the opportunity of integrating all of the services your project requires in one package with one sole objective: efficiency.

totalproject uses work systems which enable us to control and manage your supply and assembly chain by means of a meticulous follow-up of all phases, from the origin receipt to the site delivery.

With the capacity to respond immediately to your needs due to the professionalism and experience acquired by our technical team for over 95 years.

We offer you the opportunity to convert your logistics project into a mere formality due to the control, accuracy and ease of information that we put within your hand's reach.

Quality by system

The basic principle which allows our integral service which was designed by our project division to be totally reliable and effective was the implementation of the quality system conforming with the regulation ISO 9001:2008.

Quality system which ensures that our projects are optimized to the maximum to obtain client satisfaction and continuous improvement in our work systems.

Guaranteed quality in each of the phases of our projects and ensured from all the levels where our professionals are involved.

Team work

totalproject division relies on a specialised team of professionals supported by the latest technology and tools to ensure implementation success.

Our professionals also rely on the collaboration of the best companies specialised in special load transport by land, sea and air.

Our independence, as we are not aligned with any shipping company, airline or carrier, enables us to offer the best prices to our clients, for both regular loads and special services.

This is why **totalproject** division established strategic alliances for each project to ensure its perfect development in the best economic conditions and with maximum quality, always in accordance with its' principles.

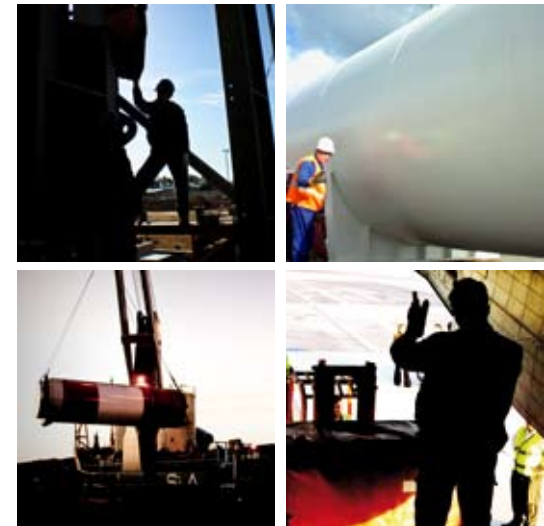

Controlling every detail

totalproject division takes responsibility for the meticulous control of each product at all times: from its approach, design, preparation and implementation.

We control the project and logistic management of the load; viability studies; component packaging; international shipment by sea or air; door-to-door intermodal service; national and international transport route study; load consolidation; custom agreement and local regulation studies; customs clearance; storage and distribution; computer issue of shipment and delivery follow-up; specialized service via EDI; handling and lifting of heavy, over-sized and dangerous goods; sea and air chartering; consultation service.

totalproject take responsibility for the global supervision of your project.

Integral logistics management

In **totalproject** we know that if we take responsibility for a project, it is so that you do not have to look after not, or even worry about it.

Our organization takes responsibility for each and every one of the details of the project to be implemented for your comfort, avoiding problems, delays and any unanticipated extra costs.

Since over 95 years ago, our organization relies on the trust of major uses in Spain, engineers and manufacturers of equipment goods.

All of these businesses and companies have enjoyed the comfort of an integral logistics service developed according to their needs and requirements.

Your satisfaction is our best profit.

Total mobility

The versatility of our **totalproject** division enables us to attend to our client's needs wherever it is necessary.

This is why **totalproject** moves a professional team of experts to the site of each project and they are exclusively responsible for the attention and development of the needs required by those who trust in our services.

Professional experts in special transport, over-sized load handling, special maintenance, technical assistance, engineering, customs proceedings, etc.

If you need us, do not ask where to find us. Just decide where you want us.
